

Vehicle Movement on Site Policy

Signed:	
Chair of Trust Board:	Claire Delaney
Approved:	1 September 2018
Renewal period:	2 Years
Review Date:	September 2020

This policy will also be reviewed following an incident or near miss involving onsite vehicle movement.

Vehicle Movement on Site Policy

SECTION 1: Procedures

1. Scope

This guidance applies to all vehicle movements undertaken on school premises.

2. Objectives

The school seeks to ensure that the site is organised so that pedestrians and vehicles can circulate in a safe manner that vehicles and traffic routes are separated wherever possible and that traffic routes are suitably signed and controlled.

3. Responsibility

The Senior Leadership Team has responsibility for the implementation of this policy with support from the Site Manager as appropriate. The following areas will be addressed:

- Vehicles on site
- Parking and deliveries
- Access control and security
- School travel plan

Checklists in Section 2 cover design and layout, reversing, risk control and specific issues, and are used to develop and review procedures and undertake risk assessments. The school ensures that signage is in place to designate speed limits, access areas, prohibited areas, one-way systems and parking facilities. The nominated Travel Plan Co-ordinator will be responsible for liaison with the police, highway authority, insurer/security advisers etc with regard to the School Travel Plan.

Parking arrangements are specified for staff, visitors, parents, those who are disabled and contractors. Additional information will be provided as appropriate in relation to special events.

Deliveries

Wherever possible, deliveries are organised to take place at times when pupils are not on site, such as before the start of the school day. Deliveries should be arranged in advance wherever possible. Where it is essential that a delivery takes place during the normal working day, drivers will be required to seek permission to drive onto the school premises. Their arrival and departure will be supervised by the site manager or a member of administration or catering staff, as appropriate, and parking will be permitted only in designated areas. See also notes below about reversing.

School vehicles and hired vehicles for trips, fixtures and other school events

Hired vehicles arrive and leave the premises at agreed times. When moving on site at times when pupils are in school, school vehicles will progress with hazard lights switched on. The trip leader/teacher in charge will designate a member(s) of staff to supervise pupils prior to boarding and after disembarking, ensuring that they assemble and wait in a safe location prior to boarding and move away safely from vehicles after disembarking.

SECTION 2: Considerations and Risk Assessment

The three sections below should be used by schools as a checklist in order to

- a. Refine section 1, above, to provide clearer procedures

- b. Undertake annual review of the policy
- c. Conduct risk assessments in relation to the activities covered by this policy.

1. Design and Layout

- Are the traffic routes wide enough for the movement of vehicles?
- Has consideration been given to the need for vehicles to pass each other?
- Can you use a one-way system?
- Does the layout allow safe movement of pedestrians close to vehicles?
- Are pedestrian walkways and waiting areas protected by physical barriers?
- Are storage tanks and sources of power, which are close to traffic routes protected against impact?

2. Reversing

- Are arrangements in place for dealing with reversing vehicles?
- Are pedestrians separated from reversing activities?
- Have designated individuals been trained to assist with reversing activities where appropriate?
- Do such individuals have high visibility clothing?
- Have vehicle drivers been informed to stop if they lose sight of the reversing assistant?

3. Risk control

- Do staff in charge of supervising vehicle movement and pupils boarding and disembarking wear high visibility clothing?
- Can arrangements be made for vehicles to be parked off-site?
- Can you provide separate pedestrian access?
- Can you organise buses to be loaded/off-loaded so that reversing is not required?
- Can you arrange deliveries/contractors activities so that they do not coincide with school start/finish times and breaks during the day?
- Can you improve on-site lighting?
- Have you communicated traffic arrangements to pupils and parents?
- Can drop-off zones be provided for parents?
- Can you enforce speed restriction on site?
- Can you provide increased supervision during peak vehicle/pedestrian movement times?
